REAL ESTATE REVIEW · NOVEMBER 2026 · PREPARED FOR JEFF & ANDREW

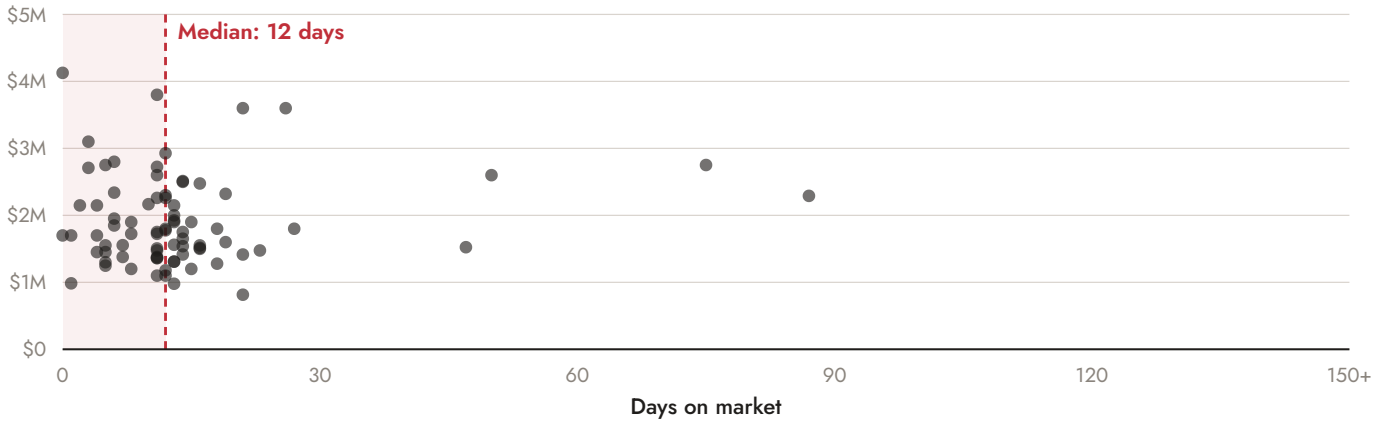

Crocker Highlands & Grand Lake, by the numbers

Oakland · Single-family homes · 12 months, Nov 2025 – Oct 2026

$1,700,000	12 days	124.9%	91
MEDIAN SALE PRICE	MEDIAN DAYS TO SELL	SALE-TO-LIST RATIO	HOMES SOLD
+6.2% vs. prior 12 months	71% sold in two weeks or less	Median sold price ÷ list price	$170.57M in total volume

Price vs. time to sell, 2026 · how fast homes actually move

Every dot is a 2026 closed sale (78 so far). The shaded zone is everyone who beat the 12-day median, and that's most of the neighborhood. Price it to invite a bidding war and you get one. The few stragglers out right were mostly priced like the bidding war had already happened.

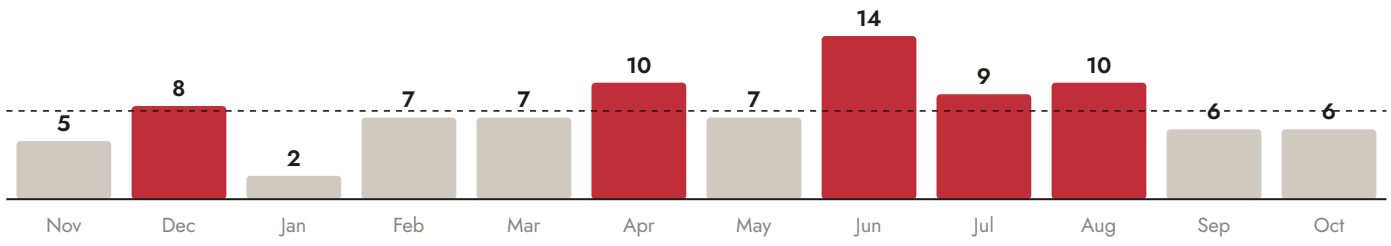

Where the market stands today

91	9	9	3	97%
SOLD · 12 MO	IN CONTRACT	FOR SALE NOW	DIDN'T SELL	ODDS OF SELLING

About 7.6 homes sell each month against 9 on the market, so there are roughly **1.2 months of inventory**. Anything under ~3 months favors sellers. "Didn't sell" counts expired or withdrawn listings that never came back and closed; plenty of withdrawals were just relaunches.

Closings by month · red = busier than average

June was the high-water mark with 14 closings; spring listings crest into early summer here. Red months beat the 7.6-per-month average. But with barely a month of inventory, even a January listing finds buyers waiting at the door.

WHAT'S MY HOME WORTH? · PREPARED FOR JEFF & ANDREW

Price vs. square footage

Crocker Highlands & Grand Lake single-family homes sales, Jan — Nov 2026 · 77 sales

Quick read: find your home's square footage along the bottom, go straight up to the red fair-market line, then look left. That's your ballpark. The line works out to roughly **$180K + $749 per square foot**, and the median 2026 sale traded at **$845 per sq ft**.

YOUR HOME · 1015 WARFIELD

+14% vs. the $790 area median then

+5.5%
AREA $/SQ FT SINCE
$790 → $833 median

$3.06M–$3.09M
MARKET-INDEXED VALUE
Your price × the area's move. Not an appraisal.

Reality check: the trendline puts a typical 3,230-sq-ft home here around $2.6M, and you paid $2.9M. That premium was the lot talking: 12,600 sq ft, roughly three times the neighborhood norm, plus five bedrooms on 1907 bones. A line that only counts square feet can't price a backyard like that. Since you bought, the area's median $/sq ft is up about 5%, so on market movement alone your place indexes to roughly $3.06–3.09M, before counting a single improvement you've made.

Same size, wildly different prices? That spread is lot, views, condition, and how well a home was prepped and priced. Square footage gets you in the neighborhood. The details get you the number.

A trendline can't see your remodeled kitchen. I can.

Want the real number for your address, not a dot on a chart? I'll put together a full pricing analysis for your home. No pressure, no obligation, just good data.
